

# Parker Cole

(940) 808-2777 · [pacole06@icloud.com](mailto:pacole06@icloud.com) · CWID: A20471508 · [linkedin.com/in/parker-cole-engineering](https://www.linkedin.com/in/parker-cole-engineering)

## EDUCATION

---

|                                                                                         |                   |
|-----------------------------------------------------------------------------------------|-------------------|
| <b>Oklahoma State University, Stillwater, OK</b>                                        | Expected May 2028 |
| <i>Bachelor of Science, Mechanical and Aerospace Engineering   Minor in Mathematics</i> | GPA 4.00          |

## PROFESSIONAL EXPERIENCE

---

|                                                  |                     |
|--------------------------------------------------|---------------------|
| <b>Advanced Manufacturing Engineering Intern</b> | May 2026 - Aug 2026 |
| <i>Peterbilt Motors Company, Denton, TX</i>      |                     |

- Supported the Chassis Powertrain and Cab & Outer Body groups on multiple advanced manufacturing engineering projects, collaborating with engineers across different areas of the plant.
- Used Creo to create and modify 3D models while developing practical CAD experience in a production manufacturing environment.
- Developed an AI-assisted tool for locating information in engineering part drawings, reducing the task from approximately 5 minutes to 1 minute per drawing.
- Managed multiple concurrent projects and communicated progress through weekly presentations, culminating in a final presentation to engineering leadership.

---

|                           |                     |
|---------------------------|---------------------|
| <b>Mover / Navigator</b>  | May 2025 - Aug 2025 |
| <i>Little Guys Movers</i> |                     |

- Promoted from Mover to Navigator within two weeks, demonstrating leadership, reliability, and adaptability in a fast-paced work environment.
- Planned efficient truck layouts and coordinated with team members and customers to complete moves safely, prevent damage, and stay on schedule.

---

|                                             |                     |
|---------------------------------------------|---------------------|
| <b>Merchandise &amp; Stocking Associate</b> | May 2024 - Jul 2024 |
| <i>Sam's Club</i>                           |                     |

- Managed inventory, product placement, and restocking while assisting customers and collaborating with team members to maintain efficient, organized store operations.

## ENGINEERING PROJECT EXPERIENCE

---

|                                                                |                  |
|----------------------------------------------------------------|------------------|
| <b>Custom Golf Putter Design &amp; Prototyping</b>             | Personal Project |
| <i>SolidWorks   Additive Manufacturing   Rapid Prototyping</i> |                  |

- Designed and iterated multiple custom mallet putter prototypes in SolidWorks, focusing on head geometry, mass distribution, assembly, and manufacturability.
- Developed a modular screw-on face concept and fabricated physical prototypes using additive manufacturing and molded components to enable rapid design iteration.
- Applied DFA/DFM principles while selecting fastening methods, heat-set inserts, and printable geometries for repeated assembly and testing.

## LEADERSHIP & ACTIVITIES

---

|                                                                                                                                                                                                                              |                    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| <b>Cowboy Golf Club - Founder &amp; President (Pending University Approval)</b>                                                                                                                                              | Aug 2026 - Present |
| • Founded and currently lead the development of a proposed Oklahoma State University student golf organization, completing the required organizational steps and coordinating with the CSO to finalize official recognition. |                    |

|                                    |                    |
|------------------------------------|--------------------|
| <b>Cowboy Rocketworks - Member</b> | Jan 2026 – Present |
|------------------------------------|--------------------|

|                                                        |                    |
|--------------------------------------------------------|--------------------|
| <b>Oklahoma State University Running Club - Member</b> | Feb 2026 - Present |
|--------------------------------------------------------|--------------------|

|                                                                                        |                     |
|----------------------------------------------------------------------------------------|---------------------|
| <b>Oklahoma State University Bands - Marching Band, University Band, Jazz Ensemble</b> | Aug 2024 - May 2026 |
|----------------------------------------------------------------------------------------|---------------------|

|                                                  |                     |
|--------------------------------------------------|---------------------|
| <b>Friendship Church - Volunteer &amp; Music</b> | May 2025 - Aug 2026 |
|--------------------------------------------------|---------------------|

|                                                    |                     |
|----------------------------------------------------|---------------------|
| <b>First Denton Church - Volunteer &amp; Music</b> | Sep 2023 - Jul 2024 |
|----------------------------------------------------|---------------------|

## TECHNICAL SKILLS

---

**CAD:** SolidWorks (Certified SolidWorks Associate - CSWA), Creo Parametric (assemblies | drawings)

**Programming:** Python

**Manufacturing:** Design for Assembly (DFA), Design for Manufacturability (DFM), manual lathe & mill, additive manufacturing / 3D printing, rapid prototyping

**Productivity:** Microsoft Office Suite
